

# MYSTIK® JT-6® INDUSTRIAL ROBOT GREASE POWERING PRECISION, SPEED, AND SMOOTH OPERATIONS.

- Outstanding resistance to oxidation and corrosion
- Protects reduction gears from wear in extreme temperature and pressure conditions
- Remains shear stable in high speed operations for assured reliability
- Manufactured locally

**100** YEARS

# MYSTIK® JT-6® INDUSTRIAL ROBOT GREASE

## WHY CHOOSE US

Manufactured in the United States by one of the largest grease manufacturers

Reduced storage costs, eliminated international shipping and improved supply reliability

Technical support from the Mystik team of industry-leading grease technology experts

## Features and Benefits

- Formulated with premium quality Synthetic Polyalphaolefin (PAO) and mineral base oils for oxidation resistance, excellent thermal stability, and lower volatility
- Formulated with a premium quality lithium 12-hydroxystearate thickener with excellent shear stability. Provides outstanding protection against wear, corrosion, and oxidation
- Contains an organic molybdenum additive for wear protection in high speed and extreme pressure operations
- Proven to provide outstanding protection for industrial robots operating under extreme conditions

## Packaging Options

- 400 lb. drum | Product Code: 015
- 120 lb. keg | Product Code: 030
- 35 lb. plastic pail | Product Code: 044
